

Helpful things to do.

The B word

Set a budget. Please remember that when undertaking a major project that increases the value of your home the way a kitchen does, things can go astray. You might run into unexpected and unforeseen costs. Plan for a cushion just in case. Pick and choose what are the most important items and deal with them first. Kitchen remodeling can range from \$16,000 to \$250,000 plus. There are many variables due to design, appliances, remodel, etc.

The budget is a sensitive subject and homeowners are often reluctant to discuss this number for a variety of reasons. It is, however, important to give a range when discussing your design. This will allow us to design within your budget and give you the opportunity to add extra expense if you wish to upgrade.

Total budget For Project: \$ _____

Percentage of budget for Remodel: \$ _____

Percentage of budget for Cabinets: \$ _____

Percentage of budget for Appliances: \$ _____

Percentage of budget for Cushion: \$ _____
